Assignment 2: iNaturalist

In this assignment, you will be recording 10 different observations you find in nature. Take a few pictures of your observation and upload them to our iNaturalist Project: "SECO Observations".

Step 1: Download iNaturalist in the app store and make an account if you have not already.

Step 2: Once you are in the app, click "More" at the bottom right of the screen and select "Projects". Search the name "**SECO Observations**", and join our project.

Step 3: Find an organism outside you find interesting and take pictures.

Step 4: Fill out all information to the best of your ability: What did you see, location, etc. The date observed needs to be between February 1st and March 10th or it will not count to our project. Make sure our project is selected.

Step 5: Click share and go to our project page to make sure it was uploaded.

Step 4: Record a **minimum of 10** observations in our project by the end of our program on Wednesday, March 10th
